

CAPABILITY STATEMENT

2022

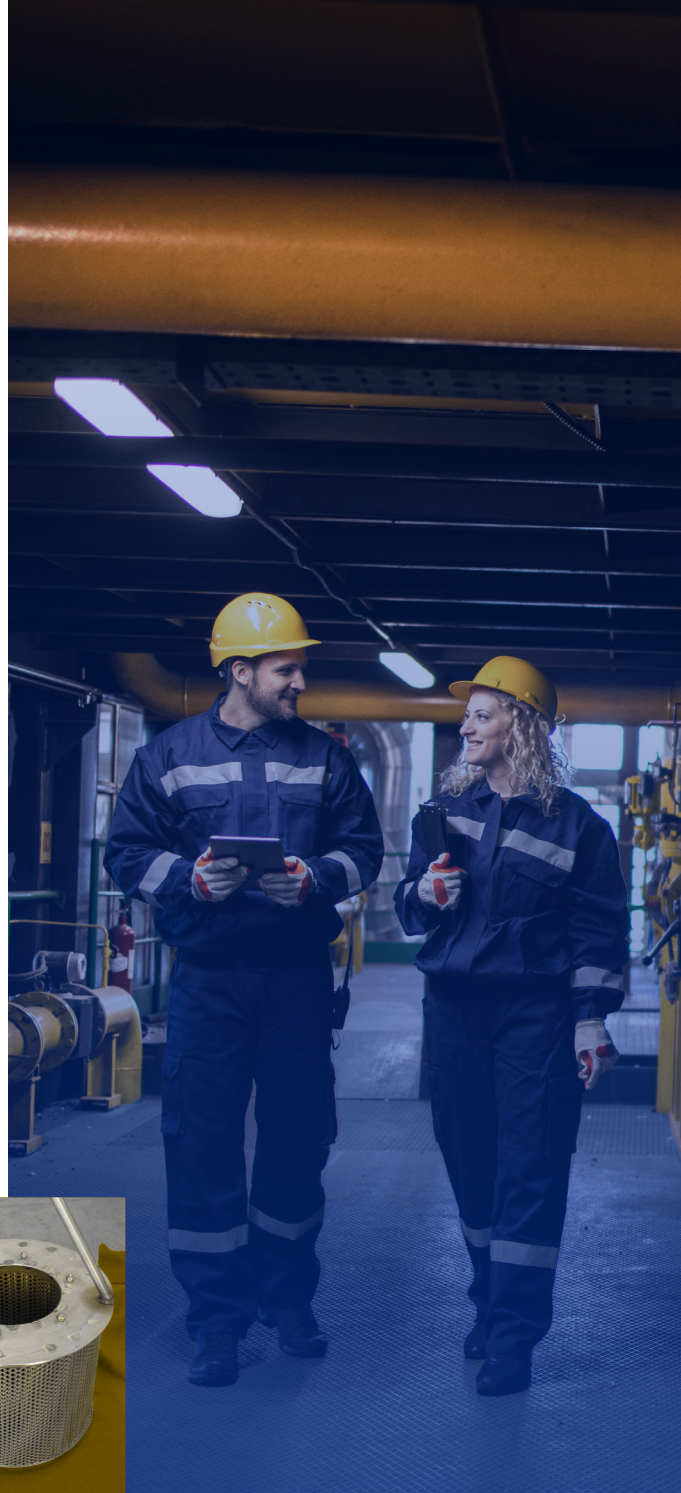

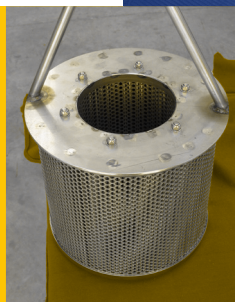

COMPANY OVERVIEW

Proudly Australian-owned and operated, Absolute Filters has been leading the filtration industry for more than three decades.

Using cutting-edge technology and innovation, we have earned a reputation – locally and internationally – as the company to rely on for the highest quality general and specialised filtration systems. From activated carbon filters to Y-strainers, we provide world-class workmanship for the gas, mining, electricity, wastewater and petrochemical industries, backed by full-project managers and solutions-based suppliers.

With a large assortment of products kept on site, we can provide quick service and supply to solve any problem – including saving endangered frogs and filtering fish eggs from drinking-water supplies. Never think it can't be done. We find a way to make it happen.

No matter how small or complicated your filtration needs, Absolute Filters has the experts, the technology and the dedication to get the job done to your satisfaction, every time.

Trusted supplier
of general and
specialised
filtration systems.
Committed to
customer service
and protecting
the environment.

OUR PURPOSE

At Absolute Filters, we pride ourselves on taking the extra step. Our specialists work with our clients until a solution is found. Flexibility sets us apart. We know one size doesn't fit all in filtration.

Utilising the very latest technology, we tailor our products to meet your needs. Saying something can't be done is not part of our language.

While competitors are shrugging their shoulders, we are finding solutions. Industry-leading filtration technology and know-how, delivered on-time and to the highest quality and safety standards.

OUR SERVICES

Creating autonomous filtration systems is our core strength, but Absolute Filters offers far more. Our services range from self-cleaning filtration systems for chocolate and paint companies, to coalescers treating raw gas pumped directly from Bass Strait. Separation of liquid slugs from gas, wastewater recycling and disinfection, coal-seam gas gathering, filtering of gold and silver, and the removal of methane from mines are among our many capabilities.

Our facilities provide for the manufacture of equipment to API 614 & 618 lubrication filtration standards, as well as ASME, AS1210, and nuclear pressure vessels.

We provide products and solutions to new technologies, and are experienced in environmental filtration systems, including a design to save endangered frogs and filtering fish eggs from water supplies.

We solve the problems that are beyond our competitors with cost-effective, time-friendly and high-quality solutions to meet filtration requirements in a wide range of industries.

AUTOMATED FILTRATION

Innovation is what sets us apart. Filtration systems designed for continuity of flow. Easy, quick access for maintenance. Tailor-made coalescers that clean gas to 99% oil/water removal.

ENVIRONMENTAL

For clean water, our Environmental Modular System kills bacteria and knocks out heavy metals. The gas generated quickly dissolves back into oxygen. No need for nasty chemicals like chlorine.

CENTRIFUGE

Our centrifuge can refine liquid products down to 1 micron. Constructed of 316-grade stainless steel, this system lends itself to most industrial applications where automation is essential.

INDUSTRIES WE SERVE

Absolute Filters provides filtration solutions across a wide variety of industries, such as mining, gas, oil, electricity, paint, wastewater and petrochemical. These range from small jobs to large-scale projects.

Major infrastructure

Government projects

Coal seam gas

Hydrogen

Petrochemical

Steel

Mining

Construction

Electricity

Oil

Wastewater

Paint

Food processing

Defence

Industry leaders. Trusted reputation. Innovative designs. Quality workmanship. We have the experience, technology, products and – most importantly – the commitment to fulfil all your filtration requirements. Visit [absolutefilters.com.au](https://www.absolutefilters.com.au) for project snapshots.

ACCREDITATION + EXPERTISE

Our commitment to the safety of our workers and clients is critical at Absolute Filters, as is protecting the environment. We work under the framework of ISO 9001 and ISO 14001, and adhere to all Work Safe guidelines.

We are fully compliant with construction and building-industry safety standards, with rigorous risk assessments carried out on a case-by-case basis.

ISO 9001: Quality Management

AS 4801: Health and Safety

ISO 14001: Environmental

Innovative technology

35 years' experience

Product knowledge and attention to detail

Respected and trusted industry leader in filtration, servicing clients locally and abroad. Our highly committed team is dedicated to customer service, with tailor-made products and technology to meet your needs.

OUR CLIENTS

Since forming in 1987, we have built a prized reputation as suppliers of superior, engineered, quality filters and filtration systems for most liquids and gases.

We specialise in automatic filtering systems, and can customise a filter / strainer system to suit your particular application.

Our list of clients across construction, civil projects, infrastructure, Government departments and utilities – based both in Australia and overseas – number in the thousands, and include **Origin Energy, Snowy Hydro, Santos, Thales, BHP, BAE, Dulux, Chevron, ConocoPhillips, ANSTO, CSIRO, AkzoNobel, Viva Energy and Visy.**

These clients trust us to deliver the highest-quality products, on time and on budget. These relationships are enhanced by our industry-leading capabilities, workmanship, innovative technology, expertise, efficiency and determination to provide the right outcome.
